About Me

I have gained proficiency in a variety of programming languages, including C++, MERN Stack, Python, and SQL, and I am eager to further develop my skills in these areas and in a collaborative team environment. As a passionate follower of technology, I enjoy watching tech-related videos and reading articles on the latest advancements in the field. And I am also a devoted football fan who enjoys both watching and playing the beautiful game

Experience

Intern at SiPSAP Optimization
Aug 2021 -Sept 2021

In my internship, I leaned towards applications development. I learned the basic principles in designing 3 tier application. Those principles helped me develop multiple projects on the university level

Folio3 Summer Internship Program
Aug 2022 - Sept 202

I participated in Folio3's Summer Internship program where I gained valuable knowledge in basic concepts of web development and android development. Through mentorship, I acquired practical skills that will serve as a foundation for my future career in technology

Education

Bachelor of Computer Science   Aug 2019 - June 2023

National University of Computer and Emerging Sciences

Projects

LearnLive - FYP

Developed a web based platform that provides Zoom for online classes, LMS, chatting feature, collaborative coding, discussion forums all at one platform using MERN Stack

Veteran Meet

Built a Facebook-inspired application where veterans could create profiles, upload content and posts, follow each other, and connect to different events using MERN and REST API

Gym Fit

Developed a web based platform for the gym, along with maintaining user profiles, workout routine and diet plans using HTML, CSS, Bootstrap, PHP and MYSQL

Carbo

Developed an application which assists and enables anyone with carpooling using JavaFX, JDBC, Hibernate, and MySQL

Certifications

- Programming for Everybody (Getting Started with Python) (Coursera)
- The Complete 2023 Web Development Bootcamp (Udemy)

Skills

- MERN Stack
- HTML and CSS
- Python
- C , C++
- Java

Courses

- Object Oriented Programming
- Data Structures
- Software Design and Analysis
- Web Programming
- DevOps
- Cloud Computing
